String Chandelier/Lantern

Bubbles made of lace

ruffledblog.com

Information

Like lace bubbles floating on air, these string balls can be hung to form a chandelier. You can also add lights to make them light up a wooded ceremony or reception venue. They're a bit messy to make, but a fun project with a group of bridal attendants helping. This project is best done outdoors or in an easy clean-up area like a garage or basement.

Idea Inspired by Ruffled

Procedure I

Prepare the Following Supplies

- Latex balloons or “punching balloons”
- Vaseline
- Glue (white school type)
- Cornstarch
- Warm Water
- Twine or yarn
- Scissors
- Quick dry spray paint (or use colored yarn)
- Spray glitter (if desired)
- Fishing line
- Tarp or shower curtain
- Bowls for glue mixtures (if using a lot of yarn, use big bowls)
- Rack, or pole (such as dowel rod) for hanging/drying wet balloons

Step 1: Set-up Work Area: Spread tarp or shower curtain on work area floor. Make sure you have some type of rack available to hang balloons while they dry. This should be placed over tarp to catch drips. You can create a rack by placing a dowel rod over kitchen chairs.

Step 2: Make Paste: Combine $\frac{1}{2}$ cup glue, $\frac{1}{2}$ cup corn starch, and $\frac{1}{4}$ cup warm water and mix well in bowl. Mix to be sure there are no lumps and clumps. Adjust quantities as needed to get correct consistency. Quantity needed will depend on how many chandeliers you plan to make.

Step 3: Prepare Balloons: Blow up balloons and rub outside with petroleum jelly. This will help prevent the string from adhering to the balloon when dry. When finished, wash hands to remove oil.

Procedure II

Step 4: Working with Yarn: Do not cut yarn in pieces. Work with one long strand. Tie yarn to balloon knot before beginning work.

- Place yarn in bowls (as much as will fit that you need).
- Allow yarn to soak up glue mixture. Squeeze out excess using fingers. Avoid tangling yarn.
- Begin wrapping yarn around balloon surface. Wrap a few times vertically and then a few times horizontally and diagonally. Keep wrapping string around making sure not to overlap any more than needed. Think of how it will look once the balloon is removed.
- Continue wrapping vertically and horizontally until you have the coverage you want. Tie (or tuck) the end of the yarn under at the top of the balloon by the knot before cutting.

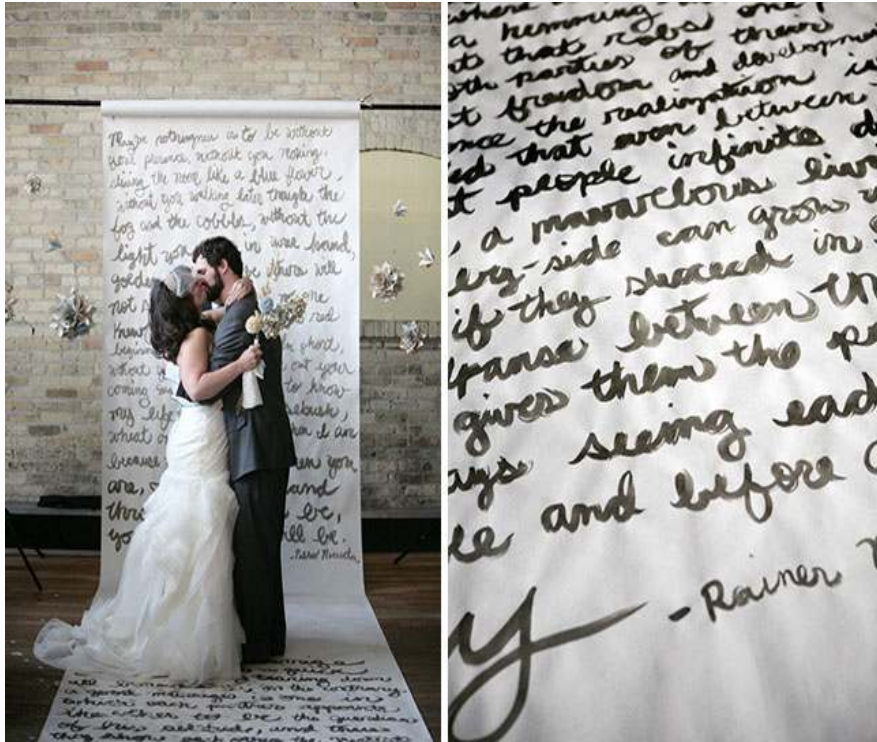

Step 5: Hang to Dry: Tie a dry piece of yarn to the balloon knot. Tie to drying rack pole. Allow to dry thoroughly – minimum of 24 hours. Rushing this process will result in failure.

Step 6: Remove Balloon: Once dry, pop the balloon. Do this carefully to avoid collapsing the string chandelier. Pull balloon through holes gently. Cutting balloon into smaller pieces with scissors may make this easier.

Step 7: Spray Paint & Glitter Spray: If you didn't use colored yarn and want to add color (silver etc), gently spray paint the dry chandelier. Do not over spray! Allow to dry. If you want extra sparkle, lightly spray with spray glitter.

Baby's Breath Bouquet

Budget blossoms

intimateweddings.com

Information

There's something ethereal and angelic about baby's breath. It's so delicate and pure that it's perfect for a wedding even when used alone in a bouquet. It's also economical (less than [\\$100](#) for 100 stems), easy to find, and easy to work with. Bouquets can be made the day before the wedding and stored in a cool place until the special moment. If you're nervous about your abilities, buy some flowers ahead of time and make a trial bouquet to build your confidence. Make sure to determine the quantity of stems you need overall before ordering or purchasing. While simple baby's breath is beautiful, you can also add greenery without adding a lot of cost.

Prepare the Following Supplies:

- Baby's Breath (Gypsophila)
- Ribbon
- Florist Pins (or Hot Glue Gun)
- Scissors

Idea Inspired by [Wedding Bee](#)

Procedure

Determine Size

Determine how many stems of baby's breath you will need for each bouquet. The bride's and maid of honor's bouquets are usually larger and more elaborate than the other bridal attendants.

Gather Flowers

Gather desired number of stems together in a bunch. Have someone hold the bunch while you wrap.

Wrap with Ribbon

Starting just below the baby's breath blooms start wrapping the ribbon tightly down the length of the stems, slightly overlapping as you go. Continue wrapping until you are about halfway down the stems.

Secure Ribbon

Secure ribbon wrap either with florist pins or hot glue. If using florist pins, make sure to insert them on a fairly sharp diagonal so they enter the stems rather than sticking out the other side.

Trim Stems

Trim the stems so that the bridal bouquet is approximately 10" long from the blooms down.

Add Additional Ribbon Bow if Desired

Confetti Chandelier

Hanging paper

projectwedding.com

Information

Very inexpensive and beautiful confetti chandeliers can be created using simple materials you may already have around your home. These delicate chandeliers can be hung above the cake table, gift table, or anywhere you want a delicate and romantic touch.

Prepare the following Supplies:

- Colored Cardstock (ideally in monotone colors or 4-5 coordinating colors)
- Large Size Hole Punch (or scissors)
- String
- Needle
- Hot Glue Gun
- Embroidery Hoop
- Paint (if hoop will be painted)

Idea Inspired by [Project Wedding](http://ProjectWedding)

Procedure

Step 1: Paint Embroidery Hoop (if desired):

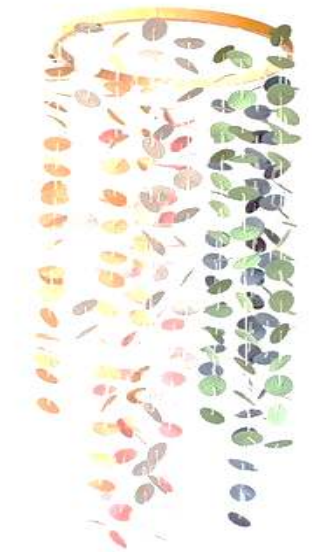

Paint to match or coordinate with confetti and/or wedding theme colors. Allow to dry fully before attaching string.

Step 2: Punch or Cut 1" Circles of Cardstock:

Make sure you punch or cut plenty for the number and length of strands you want on each chandelier. Approximately 120 or more per chandelier is a good place to start and adjust as needed.

Step 3: Use a Threaded Needle to Thread Confetti on String:

Leave 2-3" of string for attaching strand to hoop. Begin at top of thread and thread through center of each paper confetti circle. At the bottom of each confetti piece, dab a dot of hot glue to hold the piece in place. Continue working and threading down the length of the string. Continue until you have enough strands to form the chandelier with the fullness you desire.

Step 4: Criss-Cross and Attach 4-6 Strings Across the Top of Embroidery Hoop:

These strings allow you to tie strands in the center of the hoop giving a 3D effect. It also provides you with a base from which to hang the hoop from the ceiling.

Step 5: Tie Strands to Hoop and Criss-Crossed Center Strings One at a Time:

Carefully tie the strands to the hoop and center strands using care not to tangle the strands. Adjust the lengths of the strands as needed for visual interest. Attach embellishments such as silk or dried flowers to the hoop to match the theme for extra beauty.
